## Enable tangible benefits from day 1

The **tenXconsulting teams have decades of large corporate consulting experience**. From accounting, auditing, risk management, HR and management consulting services we have seen it all. Tired of enriching large corporates we made the move to Cape Town to set up shop and turn our focus to **small and mid-corporate organisations**.

As the cornerstone of SA industry these businesses have so much to offer, **but have mostly been left behind when it comes to quality business optimisation skills** required to address key corporate issues.

**Our aim is to partner with corporate executives** to identify burning issues, target those that would enable the most business benefits, and set to work to unpack, recommend and implement corrective strategies in order to move forward.

**BUSINESS EFFICIENCY**

**COST SAVINGS**

**BUSINESS EFFECTIVENESS**

**AUDIT READINESS**

**BUSINESS SUSTAINABILITY**

### EXECUTE

#### Extract value from day 1

Our teams are passionate about creating value for our clients and getting things done

## Allowing you to focus on growing your business and customer base

The evolving regulatory landscape, consumer indebtedness, digital disruption and slower economic growth is forcing organisations to rethink traditional business operating and growth strategies.

Where the resultant impact is mostly reported on by large corporate organisations, it is typically small-to-mid size corporate that is most hard hit. This often forces such organisations to do just-enough to ensure that they are regulatory and operationally stable to do business.

This just-enough mindset typically forces organisations to prioritise focus towards keeping their product and services operational. Where this could assist them in remaining profitable in the short term, long term growth and scale will however be severely impacted

In order to address these challenges Small-to-Mid size corporates will need to overcome traditional organisational challenges including competing business priorities, traditional operating models and access to funding.

Those who rise to the challenge will be well-positioned realise business efficiencies, reduce operating costs and ensure better regulatory compliance, whilst driving more frequent and meaningful client interactions and outcomes.

At tenXconsulting we partner with organisations to identify key areas of risk to investigate, unpack and optimise. Working closely with business executives we allow them to reach farther, get more done and realise business benefits faster.
